OFF LABOR SUPPLY

Baltimore and Ohio R. R. Bulletin Seeks Economic Check in Decreased Immigration.

"Immigration statistics compiled by the American railronds for the last ten years indicate an effect of the Euro-pean war which will be felt for years to come in the industrial, economic, and social life of this nation through a check which will be placed on develop-ment as a result of a scarcity of inunigrant labor and slow growth of population," a press statement issued by the Paltimore and Ohio Railroad Company

lation," a press statement issued by the Haltimore and Ohio Railroad Company today says:

"Contractors and other large employers of foreign labor will feel this effect most noticeably, for experience has proven that with the assimilation of American customs and ideas it is seldom that more than the first generation of foreigners continue as laborers, their thrift and ambition leading them to commercial pursuits and trades. The places thus vacated have heretofore been filled by newcomers.

"Another effect of the war has been to cause thousands of foreign men to leave their work in American industrial concerns and return to their native countries to engage in military service. With the large humber of fatalities and the destruction of capital, those in touch with the situation here believe that the European governments will make strong efforts to keep their subjects at home after the close of the war, thus curtalling the supply of labor available to carry on our economic development and commercial expansion.
